

What is it?

Test-Prep Jamboree

Software, K-12 Program, and Game
by Dimension 2000

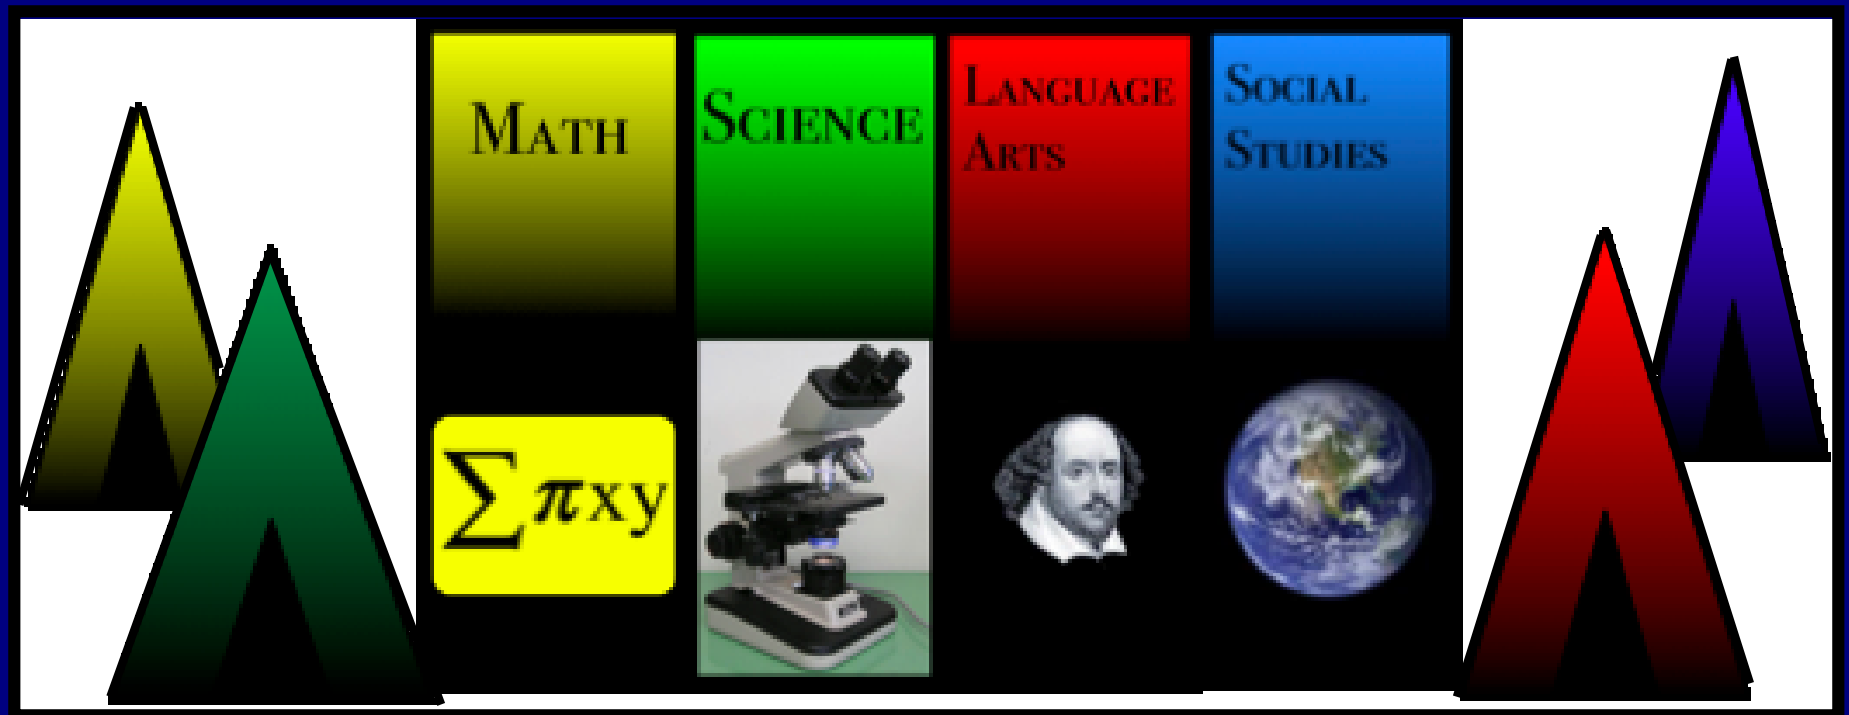

Test-Prep Jamboree is a new and innovative way to review and reinforce important concepts and skills in any subject. The technology-based game works great with an interactive white board, classroom LCD projector, computer lab, or computer station.

The Test-Prep Jamboree game board contains an animated random point generator and displays a variable number of academic categories. Sample math categories are shown here.

How is the game played?

• **Prior to playing the game, the teacher determines the categories, questions, and answers that will be featured in the game. Test-Prep Jamboree software allows teachers to easily create and save any number of game files that feature any range of categories, questions, and answers.**

Questions and answers can include both text and graphics!

This exciting feature means that math teachers can create questions that display important graphs, tables, and shapes. Teachers in all disciplines can access this powerful feature as well!

On the day the game is played, the teacher divides the class into any number of teams. For each team a captain is selected who serves as the team's official spokesperson. When a team is on the docket, the captain chooses a category. The random point generator determines the number of points at stake. A question appears. All teams have a designated window of time to solve the problem. Each team captain collaborates with their teammates and records their team's answer. When the designated time expires, the captain of the team on the docket has first dibs at stating the correct answer and capturing the points at stake. If the captain's response is wrong, that team loses the designated points, and the computer randomly selects another team that can state the correct answer and capture the points lost by the initial team. When a team is on the docket, they can opt for another turn in response to a correct answer. The flow of the Test-Prep Jamboree game ensures that all students are engaged and having fun!
